I did. Thanks. This is the last thing Puerto Rico needs. If you have a pfoa Google alert set I don't forward these to you. I don't mind forwarding but don't want you to overload your inbox. It is a lot to keep track of and I appreciate you doing it. I read every article and learn a lot from them. I send some to the region 1 RA and DRA and they appreciate receiving all the pfoa clips.

Wow, the volume of PFOA and lead in schools drinking water, and related contaminant media clips this weekend is not to be believed (and the weekend is not over!).

Make sure you see the NY Times Zika in Puerto Rico piece (very sad):
